

EMERGING ENTREPRENEURS

emPOWERING regional YOUth- Entrepreneurs and Innovators of tomorrow

Do you have an idea for a startup (great if you do, doesn't matter if you don't)? Are you interested in learning the skills to turn that idea into a reality (a business that makes you money)? Yay!

Hinchinbrook Chamber of Commerce in partnership with Queensland Government and theSPACE Australasia (a reputable Cairns based Start-up and Innovation Hub) have partnered with other industry experts to bring a 5-week extracurricular youth-based entrepreneurship education program.

The program will include:

- Five sessions (2 hours per day)
- You'll learn skills like - pitching, agile planning, idea screening, market validation, minimum viable product development, stakeholder and community engagement
- Field excursions including visits to local innovators, inventors and businesses
- Mentoring from Luke & Kara (our amazing facilitators)
- Networking other cool kids
- Working with technology educators and innovators
- Collaboration with industry entrepreneurs and employers

Industry focus includes agriculture, IT, tourism, marine and environmental management, but in reality the ideas will only be limited by your imagination.

Preparing for the future

We recognise advances in technology will impact the types of employment available in our region and to you over the next 10-15 years. To prepare we want to encourage entrepreneurship and foster transferable skills that allow young people (like you) to thrive during changing times. Focussing on entrepreneurial skills will allow you to leverage emerging technology, work from anywhere, create opportunities in any industry and most importantly find something you love doing and do that!

When: Each Wednesday for five weeks commencing August 15 2018 - Field Trip on a Saturday
